

iHelix Hospital

Specifically designed for small community hospitals, large medical clinics and long-term care facilities, the iHelix Hospital solution is comprised of individual, but integrated modules - including an advanced electronic medical record (EMR).

iHelix Hospital - Integrated Healthcare system for Hospital

iHelix Hospital is an enterprise-wide solution that provides complete patient information across all points of care to allow healthcare provider to deliver the best care possible.

On demand :

It helps organization to operate on the iHelix platform without going through a time taking implementation process. The on demand solution from Sajix helps the healthcare industry to use the state-of-art technology with monthly affordable price.

On premises :

In this, iHelix is implemented at customer data center behind customer's firewall. Sajix provides license of iHelix to customer and customer owns and manages the software.

iHelix Hospital

Our iHelix Hospital product suite is available in two different delivery models-in-house server or web-based ASP. Again, this allows our clients to choose the model that best suits their needs.

iHelix-Hospital
